March 1999

Dear Friend,

Welcome to the new-look *Searchlight*.

Searchlight is Britain's leading anti-fascist magazine. First published in 1962, we are now celebrating our 25th year as a monthly magazine. During this time we have acquired an unrivalled reputation for exposing racism and extremism in Britain and abroad.

Searchlight exclusives include:

- Linking the alleged murderers of Stephen Lawrence to British nazi organisations;
- Playing a leading role in bringing nazi war criminals to justice;
- Revealing an international right wing plot to destabilise the newly elected Mandela government in South Africa;
- Exposing the nazi music scene, resulting in prosecutions and the seizure of thousands of pounds of illegal CDs.

The new-look *Searchlight* will build on its unique investigative reputation, however the expanded magazine will also look at:

- Nationalism and Identity;
- White ethnicity;
- Eugenics and race science;
- Individual countries in focus.

Several times a year *Searchlight* will devote an issue to a specific theme. Our first special issue, *From Compounds to Congress* will investigate the far right in the United States. Written by North American academics, journalists and anti-racist activists, this issue will discuss race and religion in American history, the militia movement and Middle-American nationalism.

We hope enjoy your complimentary copy of *Searchlight*. To stay informed about the racist right here and abroad subscribe to *Searchlight* magazine. See the back page of the magazine for details.

Yours faithfully,

Nick & Steve
