

International False Rape Timeline

– hangout – (102) Defamation

This entire hangout is devoted to the late Jeffrey Epstein and that chiselling little whore the former Virginia Roberts. The release of the Epstein documents from the Giuffre/Maxwell civil suit has resulted in a veritable avalanche of prejudicial coverage about especially Prince Andrew, whom it must be stressed did nothing wrong, nothing illegal anyway.

Herein I deconstruct the false media narratives, quoting from the original local press articles relating to Epstein's first prosecution. I cover the lies about Alan Dershowitz, Giuffre's own admissions relating to her trafficking girls for Epstein and draw comparisons with genuine victims of this sordid trade.

The controversy over the Prince Andrew/Roberts photograph is also covered, a photograph which even if genuine – and I think it probably is – means nothing or might even be considered exculpatory. I refer to the camera as a Polaroid. The offending photograph was apparently developed in a shop, which kind of rules that out. Nowadays of course, people use digital cameras, mostly their phones, exclusively.
