

International False Rape Timeline - live hangout (13) - The Three D's Of False Rape Allegations

I began with a mention of the conviction of a sixteen year old boy for the rape and murder of six year old Alesha Macphail then turned to drink, drugs, and delay. I discussed a number of actual cases beginning with the genuine ones of serial rapist John Worboys and homosexual serial killer Stephen Port. “Operation Matisse” - the truth about drug-facilitated rape - ie young women drinking themselves silly then being unable to remember what they did the night before.

The recent case of the woman who was convicted of outraging public decency for performing a sex act on a stranger. She claimed amnesia.

The effects of excessive consumption of alcohol on especially women, regret sex, and so on.

Drugs and hallucinations including from anaesthetic, confabulation.

I discussed three cases I've mentioned before: Graham Dawes, Andrew Bond and white slut Courtney Thornton who falsely accused the black football player Rodney Anderson in Norman, Oklahoma.

How purported delay is used by malicious women including female psychopaths to falsely accuse innocent men. How the specious rape trauma syndrome is used to explain away purported delay. How rape crisis centres perpetuate miscarriages of justice by encouraging delayed reporting.
