

Ilhan Omar — FAKE MOSLEM

The four freshman Congresswomen christened The Squad by Donald Trump is made up of Alexandria Ocasio-Cortez, Ayanna Presley, Rashida Tlaib, and Ilhan Omar.

Because they're all left wing bitches and not white, they all think they have some sort of special privileges. Presley is simply a black woman with attitude and not much else. Tlaib has a sewer mouth and an ear-piercing whine. Ocasio-Cortez is of course the most high profile member of The Squad, and clearly also the least intelligent. If she kept her mouth shut she could pass for someone's trophy girlfriend, but she doesn't keep her mouth shut. Whenever she opens it, she spouts rubbish, and increasingly, lies.

Ilhan Omar is in an entirely different league from the rest, and unlike them is clearly highly intelligent. She has been smeared as an anti-Semite because she is unafraid to call out Jewish dirty tricks in America politics. Her comments about it's being all about the benjamins and Israel hypnotising the world were both spot on. However, it is one thing to call out the dirty tricks of others, and another entirely to own your own shit as the saying goes.

Yeah, right, 9/11 was something some people did.

But if Omar is unwilling to call out Moslem bad actors, it isn't out of extreme partisanship, because quite simply her profession of the Islamic faith is a sham. Yeah, sure, she wears a hijab, but take a gander at this.

That's right, she calls herself an intersectional feminist. Intersectionality is a meritless feminist dogma formulated by an airhead black academic, Kimberlé Crenshaw. It's based on the same deluded thinking as white privilege.

Omar has also declared herself to be totally opposed to the death penalty under any circumstances, something that is very un-Islamic. But truly shocking is Omar's endorsement, not simply tolerance of, but endorsement, of sexual perversion. Here she is with two members of her local rainbow coalition. That's right, she actually joined a gay pride march, if you can believe that.

No, it isn't true that Islam persecutes homosexuals, no more than did the UK before Wolfenden, but it does insist on keeping sexual perversion out of the public space, and especially away from the young.

Ilhan Omar may be no anti-Semite, but she is no Moslem either.
