

International False Rape Timeline - live hangout (24) - Letter To Liam

The main subject of this live hangout was the falsely accused Liam Allan and his ludicrous, indeed suicidal approach to false allegations and miscarriages of justice.

I began with a shout out to my site sponsors.

News and related issues covered included:

The conviction for rape in Indiana of Ryan Baxter, an older case, that of Eugene Candler - whose name I could not recall.

The set up of Kevin Spacey, which has collapsed.

The suspension of two senior police officers.

A mention of the alleged gang-rape case in Cyprus - for which the accuser has been charged.

The alleged suicide of Jeffrey Epstein - the big story of the month in this field - and his whore/procurer Virginia Roberts.

An update on the Kenan Basic case.

The ongoing tribulations of Harvey Proctor.

I had some rather unflattering things to say about Liam Allan. Among other things I played a clip of Jerry Hayes explaining how the case was stopped. I had some far more unflattering things to say about Rape Crisis and the sexual grievance industry in general. And the apathy if not collusion of the criminal justice system.

I finished off with a brief discussion of his MSc. He really has swallowed the Kool-Aid.
