

International False Rape Timeline - live hangout (21)

- Real Victims And Head Cases

This video was recorded live, but I had a connection issue so from around 31.40 seconds it has been re-recorded with a bit of repetition.

This live hangout was devoted principally to the case of Fern Champion, a genuine rape victim but one who is in danger of becoming a head case. I also covered a number of other subjects in the news including serial sex attacker John Worboys, and the utterly disgraceful case of the falsely accused Kenan Basic.

There is a new attempt to obtain more (unwarranted) convictions for rape, this time in North Carolina, by peddling the garbage about trauma.

False accuser Wendy Rosher - known by her maiden name Wendy Wild - who kicked the bucket recently. She was one of the lying hags who destroyed Rolf Harris.

The appeal of Cardinal George Pell, in Australia, the latest nonsense about Donald Trump who was accused of rape by certifiable lunatic E. Jean Carroll.

Head case Karen Reddin was the victim of sexual harassment and possibly a minor sexual assault. I mentioned Landen Gambill, but as I said, this was largely about Fern Champion; I compared her with the Rucksana Khan dog attack case and murder victim Sarah Payne cases, from a trauma perspective. Sarah's father literally drank himself to death. Hopefully, Fern will not do the same.

Sarah Payne was actually murdered in July 2000, probably July 1, and not September 2000 as stated. Michael Payne was found dead in his home October 2014, and not September 2014 as stated.
