

International False Rape Timeline - live hangout (22) - When Women Fight Back

I began with a round up of news stories:

The parole of female paedophile Vanessa George; the Sam Ukwuacha case - which is incredibly complex from a legal perspective; the latest allegations against Donald Trump - transparently false nonsense. I covered the latest outrageous charge against John Leslie - from 2008. I covered the latest developments in the Jeffrey Epstein case, and one of his named accusers - the liar and whore Virginia Roberts.

I mentioned the latest contrived controversy over mobile phone evidence from rape complainants, and the so-called Centre For Women's Justice. And another manufactured controversy - over anonymity for men accused of rape. A bit more about media brainwashing through soap operas.

I played a clip (audio of course) of Juliana Ossa, the ten year old girl who fought back against an extremely dangerous predator - an alligator! - and got the better of it. (She was actually ten at the time, not eight as I said).

I also covered the attempted murder of Lady Lucan, and the abduction of Carol DaRonch by Ted Bundy. The case of serial rapist Toby Griego - absolutely horrible. I couldn't not mention the case of Chima Benson and her encounter with a serial killer. The case of the woman who bit off the tongue of her teenage rapist was amusing. The rapist shot in the face by his victim wasn't laughing. Remember - genuine victims have bruises, not credibility issues. They usually fight back and almost always report fairly promptly.
