

Why Black Americans Should Vote For Donald Trump

[This is a transcript of my narration only.]

For decades, Donald Trump was an American icon; he was particularly popular with American blacks, including rappers, and, would you believe, both Al Sharpton and Jesse Jackson? Here's why.

Strange then that since 2016 he has been portrayed by the mainstream media as the White Supremacist In Chief. This came about not because Trump suddenly joined the Ku Klux Klan, but because the powerful special interests he railed against were intent on stopping him. This was the speech that allowed them to promote this lie.

They used this to claim Trump had called Mexicans rapists, but listen again to what he actually said, carefully. Mexico, indeed the entire world, is sending people who have problems, big problems, and now, those problems are your problems.

These thugs are believed to be members of an organised Venezuelan gang. If this is what they do to the police, imagine what they will do to you.

Joe Biden, or whoever is really in charge, has encouraged perhaps as many as ten million illegal immigrants to enter the country. They are also spending billions and billions of dollars to fight a proxy war against Russia in Ukraine. This and their other insane policies, are destroying America. Unless Donald Trump or someone like him is elected next November, America will be finished, because the country cannot survive another four years of Democrat misrule.

Race-hustlers like the aforementioned Al Sharpton consistently portray blacks as an oppressed and impoverished minority. There are poor blacks, but there are also poor whites. The reality is that most American blacks had never had it so good until recently. Writing in his 1966 book *...Bondage Of The Free*, Kent Steffgen pointed out that "U.S. Negroes own 4.5 million automobiles —one to almost every four persons. In the Soviet Union, there is only one car for every 350 people, and most of those are either state-owned or owned by high-ranking officials."

The Soviet Union was so poor because it was socialist. Socialism has been extremely successful if you call enslaving people *en masse* success. Socialism sounds good, the very word sounds good. Who doesn't want to be social? If you're not social, perhaps you are anti-social.

The reality is that socialism is big government, it is unelected bureaucrats telling you what you can say, where you can live, where you can work, how much you can earn, whether or not you can travel abroad, or even out of state. If you think that is an exaggeration, you must have forgotten already the Covid lockdowns when you were told you had to be vaccinated or quit your job.

Much of the success of socialism is due to the manipulation of language which takes so many people in. Then there are the lies. Then there are the false narratives. With black Americans, the most grotesque false narrative is racism. That's one that is easily disproved. Take the issue of police brutality, that's all about racism, right? Take a gander at this short montage then think again.

Police brutality is universal, and even women aren't spared from it. It shouldn't be tolerated anywhere, but the big difference is that when white Americans are on the receiving end, they don't burn down the neighbourhood, probably because they haven't been infiltrated to the same extent by bad actors.

Remember the Black Lives Matter gang? This woman is Patrisse Cullors. During the Summer of Floyd she and her ilk gloated and did nothing to stop the rioting. This is how she reacted when a 5 foot 6 woman went looking for her.

Black Lives Matter is a scam, one of many, many Democrat scams. The Democrats have used blacks since the 1960s, yet in spite of their broken promises after every election, you keep voting for them, probably because there are so many leading black Democrats. Like their white counterparts, the black Democrats who run many American cities are more concerned with lining their own pockets and serving the special interests than serving you.

Then there are so-called progressives, like this woman.

What a moron. Walgreens are closing their stores in black areas because of racism. No, they and other large retailers are closing their stores because the Democrats who run these areas have as good as legalised crime, including shoplifting.

So why is America being flooded with illegal immigrants? The reason is the Great Replacement. This is what is known as an anti-Semitic conspiracy theory. Yeah, right. It isn't whites who are being replaced though, not the white elites, it's you. Remember when Florida Governor Ron DeSantis sent a planeload of just fifty bogus asylum seekers to Martha's Vineyard, island playground of rich Democrats? They were shipped out of there in 46 hours, not 48, 46.

This is one of the palatial estates on Martha's Vineyard, and the mansion of a certain Michelle Obama, your homegirl, remember?

Illegal immigrants are very different from legal immigrants. Legal immigrants often have skills or capital to invest. Most of the illegals flooding into America have neither. Many of them speak little if any English, and we don't even know who most of them are. Would you invite a stranger into your home without identification? Of course not, yet they are being flown around the country without proper ID. Even if you are not old enough to remember 9/11, you must be aware of how airline security was strengthened after it. Yet suddenly, the Democrats don't care.

These people are also an enormous drain on resources. The Biden gang can send billions to Ukraine, but what do they have to offer you?

Under Jim Crow, many blacks believed themselves to be second class citizens. Well guess what, they are now. This is how the people of Chicago see this invasion.

So what will happen if the Democrats win, or more likely steal another election? You will become third class citizens, that's what.

I must stress, this is deliberate Democrat policy. How do millions of impoverished people find the resources to trek all the way up from Central America, South America and further afield? It isn't the dreaded cartels who are doing this, it is a plethora of NGOs who are being paid to do so by the American Government with taxpayers' money, your money.

One other thing, the Democrats claim the riot that occurred on January 6, 2021 was an insurrection, and they blame Donald Trump for it. The reality is that while Trump knew there would be trouble because many people believed the election to have been stolen, he offered Nancy Pelosi extra security. And she turned this offer down. We also know there were *agents provocateurs* in the crowd, like this man, who when he was eventually taken to court was given a slap on the wrist.

Anyone who challenges the Democrats' lies is called far right or a conspiracy theorist. If something is happening, it isn't a theory, and the destruction of America is happening before your very eyes.

This is the way Joe Biden talks to you.

This is the way Hillary Clinton does.

And this is the way Donald Trump does, the same way he talks to everyone else. Everyone he likes.

Donald Trump didn't need to run for President in 2016. Any other man of his age and station would have spent his time playing golf, hanging out with old friends and his grandkids. Unlike Barack Obama and almost every president before him, Donald Trump left the White House a poorer man than he went in. He gave up his golden years for America, and his enemies are determined to destroy him for it. His enemies are your enemies.

I could say a lot more, about how the Democrats are planning to confiscate your guns, how they are spying on your bank accounts, and how they are indoctrinating your kids with pornography in schools. But if you haven't got the message by now, you never will. If you vote for the Democrats you won't get what you want, you will get what you deserve.

Not that it matters but I used the word "those" instead of "these" in the Kent Steffgen quote. We can argue about grammar but there is no arguing with the content of this excellent book which can be found at the Internet Archive. Please check out related works on my main website, in particular *The Man Who Invented "Racism"* and *Racism And Brainwashing: A UK Perspective*.

There is also a recording of the latter.
