STOPORN NOW CAMPAIGN

(No to Williams)

In view of recommendations (The Williams Report, now being considered by the Government, which would remove all legal controls over printed obscenity and actively make hard core pornography, including paedophilia, legal. And in view of the fact that as a result it would be impossible to protect children and society from the adverse effects of it.

We, the undersigned, call upon the Government:

- 1 To tighten the existing legislation which now allows obscene material to be widely distributed.
- 2 To ensure that effective legislation to prohibit the publication and sale of pornography is introduced without delay.
- 3 To bring Broadcasting and Censorship Commission legislation
